

5 reasons why

SureSTART collection

Five reasons why to choose our portfolio

1. Assured quality and performance

Stringent quality checks for all our SureSTART products

The high standards of quality and performance of our Thermo Scientific™ SureSTART™ collection are the most stringent in the marketplace—ensuring that you have the products to support your application and regulatory requirements.

We continually strive to deliver innovative products to customers who need extra performance for their most challenging analyses, and we're proud of the market-leading patented products we have within our SureSTART collection—made for customers just like you. You can be confident that you're getting the most precise and consistent measurement of low-level analytes from vial-to-vial, lot-to-lot, and over time.

- Thermo Scientific SureSTART products— Assured quality and performance

2. Instrument compatibility

Complete compatibility for all add-on and integrated chromatography autosamplers

If your lab uses instruments from different vendors, you need products that can be used successfully without causing issues. Our collection of vials, caps, inserts, kits, well plates and mats, contains a broad selection of products to provide complete compatibility for all add-on and integrated chromatography autosamplers.

3. Sample security and low compound adsorption

Keep your valuable samples safe and secure for testing with our market leading products

If you are concerned about analyte adsorption, pH shifting, adducting or contamination, you'll be happy to know our SureSTART collection can give you the confidence you need. When analyzing valuable samples, you'll have full assurance that they are safe and secure for testing, and that there will be no losses incurred during the time they are kept in the vials.

Using our patented technology, you can be assured that our vials prevent analyte loss from either the cap top or compound adsorption to the glass surface.

Our products are made from the highest quality glass and plastic, so you'll spend much less time reviewing background peaks or hunting for analytes that have shifted retention times; and more time focusing on critical data analysis.

4. Better product experience

Three distinct performance levels to meet your price and performance needs

With three distinct product levels—differentiated by performance and value—selecting the right product is simple, clear and easy. We have added performance level “waves” on most of our vials to help you select the right product for your experiment.

Best yet, our collection is packed with certified and innovative products to support your daily analyses. Need help? Contact our customer care, which is always available to provide fast, expert assistance, should any issues arise.

5. Power to extend your consumables budget

The more you buy the more you save

If you are working within a budget, our SureSTART collection offers several ways to realize extra value and extend your funds. If you need products that meet your required performance, you'll love our new bulk purchase options on our vials and caps. We now offer three different pack sizes: a 100 pack, a 10 × 100 pack and a 50 × 100 pack—each with their own part numbers. With bulk discounts built-in, the more you buy, the more you save. If your budget fluctuates, you've got choices. You can try products from our different performance levels to see if they meet your analytical requirements
